

Software solution for Carbon Border Adjustment Mechanism (CBAM) – automated CBAM reporting

The Carbon Border Manager

- Our Carbon Border Manager is part of the established and award winning software Check Your Value Chain (CYVC) by PwC
- Can be interfaced with your SAP system and also works stand alone via data upload (for customs data files from brokers and authorities)
- Automated process of supplier, operator and installation data collection from the request forms generated by the tool
- All data sources are linked to our secure and centralised Carbon Border Manager to generate an up-to-date CBAM report

THE FUNCTIONALITIES

Automated CBAM data collection	Maintained with updates in CBAM regulation	Real-time dashboarding of CBAM data and updated default values	Facilitating comparisons between actual and default emissions
Automated report creation	Facilitating ERP interfacing	CBAM certificate management*	Automated notifications on data requirements

*from 2026

THE ADDED VALUES

Full Coverage

- + One stop solution for CBAM compliance and impact assessment via our integrated end-to-end solution: data collection, business partner communication with suppliers and operators, guided report compilation and data validation
- + Data integration through file upload and API
- + Supplier-friendly data requests for collection of actual values of production emissions with automated processing of responses
- + Compatible with EU Commission's suppliers' communications template
- + Generation of a fully EU compliant XML CBAM report file, saving time and efforts

Enterprise-Capable

- + SAP-based solution, secure and scalable platform
- + For use by single and for multi-declarant scenarios
- + Organized segregation of duties

Compliant and Reliable

- + Assured compliance by PwC: fully up-to-date CBAM obligations, powered by our PwC CBAM experts at the back end.
- + Reduced errors in CBAM reports, thereby reducing the risks of penalties and audits.
- + Effective strategy and decision-making based on data-driven insights from dashboarding key supply-chain data

PwC BENEFITS

Supply chain expertise

Comprehensive experience in developing and implementing the regulatory requirements for supply chain transparency

A holistic approach

An interdisciplinary team with expertise in sustainability, data management, production processes, law, and reporting

A technology-based approach

Orientated towards technology-based solutions and the impetus to automate processes by further developing tailored IT system landscapes
