

# Carbon Border Adjustment Mechanism (CBAM)

CBAM compliance in the transitional period (1/10/2023 - 31/12/2025)

EU CBAM impacts **various** commodities imported in the EU, covering iron, steel and aluminium goods, cement, fertilisers, electricity and hydrogen (+700 different CN codes). During the transitional period (1 October 2023 to 31 December 2025), companies need to report on the carbon emissions linked to the imported products in scope. Compliance with these reporting requirements remains a big challenge for many EU importers and non-EU manufacturers.

## Our approach

We believe in working in a pragmatic, time and cost efficient and trustworthy way.

After evaluating your CBAM compliance obligations, our expert team provides assistance throughout the reporting process, ensuring your company can meet its reporting obligations for all goods imported by your importing entities across the EU. This includes:

- 1 CBAM scope assessment**  
We analyse your import data and customs procedures to assess your exposure to CBAM reporting obligations. We recommend repeating this regularly to remain current with compliance obligations, even for low volume or infrequent imports of CBAM goods.
- 2 Access the CBAM transitional registry**  
If your company is identified as a CBAM reporting declarant, we guide you through the procedure to access the CBAM reporting portal and support your collaboration with the relevant authorities.
- 3 Customs data collection**  
Our tailored customs data template assists you to collect all mandatory information from your customs data (internally from your ERP and externally from the customs authorities and your brokers).
- 4 GHG data collection**  
We support the calculation of the **carbon footprint** of goods imported in the EU based on the EU CBAM methodology. For this, we provide data collection templates, GHG technical guidances and workshops for you and your suppliers.
- 5 CBAM reporting**  
We help you to consolidate and integrate customs and GHG data for your CBAM report. If necessary, we can also provide you with an easy-to-use specific CBAM report template.
- 6 CBAM report submission**  
We provide support to ensure that your CBAM report is successfully submitted including our **XML converter**, which enables the direct upload of your report, eliminating the need for manual entry.
- 7 CBAM ad-hoc assistance**
  - CBAM reporting automation,
  - CBAM financial assessment,
  - Legal support (NDA, contracts update, etc.), and
  - Authorised CBAM declarant procedure.

Feel free to reach out to us for more details on how we can assist you in this process.
